

a. Volume indicators

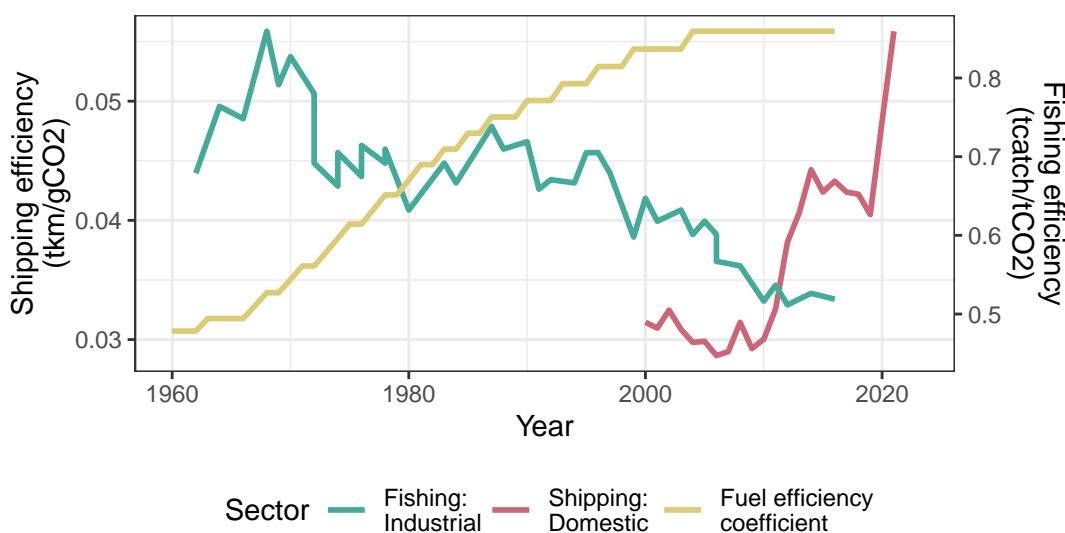

Data sources:
World bank capture fisheries production (tonnes)
OECD Annual transport trends

b. Emissions indicators

Data Source:
All maritime: OECD Maritime transport CO2 emissions
(breakdown by vessel type available,
transformed Tonnes to Mt by dividing by 1,000,000)
Domestic: IEA Energy End uses and Efficiency Indicators Highlights
Missing Fisheries emissions from Greer et al 2019

c. Efficiency indicators

Data sources:
Domestic shipping: IEA energy end uses and efficiency indicators database
Fishing (Industrial): Greer et al 2019 Fig 3
Fuel coefficient: inverse of fuel coefficient from Greer et al 2019 Table 5
